About this record

Several editions of Ptolemy's Geographia (Geography), translated into Latin from the original Greek, were published in Europe in the 15th century. This map is from the 1478 edition, which was published in Rome. Ptolemaic atlases included 12 maps of Asia. The "Sixth Map of Asia" covered the Arabian Peninsula. The outlines of this map are crude, but many geographic features, including the Red Sea, the Indian Ocean, and different features of the peninsula are clearly recognizable.

Sixth Map of Asia [F-1-1] (1/1)
